BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 34 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO provided information on salinity control projects in the Colorado River Basin, focusing on: (1) the projects cost and status; (2) factors considered in selecting salinity control methods; and (3) the Department of the Interiors measures of program effectiveness. GAO found that: (1) federal agencies spent about 362 million on salinity control projects through September 1994 and plan to spend an additional 430 million on land management activities; (2) the Bureau of Reclamation (BOR) spent about 266 million on salinity control projects, primarily to line irrigation canals to eliminate water seepage; (3) the Bureau of Land Management spent about 7 million on its salinity control projects which concentrated on reducing the erosion of soil that has a high salt content; (4) the Department of Agriculture spent about 89 million to reduce water seepage through more efficient irrigation methods; (5) the key factors in selecting salinity control methods include effectiveness, cost, feasibility, and effect on the environment; (6) salinity levels have been at or below the Environmental Protection Agency's limits; and (7) BOR expects salinity levels to remain within the established limits beyond 2010 with the addition of new salinity control projects. This item ships from La Vergne, TN. Paperback.
