The present book describes a working Inertial Propulsion Device delivering a 30 gram thrust magnitude proof positive mechanical pendulum tests measurement displayed in a video; this is the only working calibrated pendulum test video of a small 1.8kg 150watt inertial propulsion device available on the internet today, from and youtube ggutsche1 PC130005. This publication explores Inertial Propulsion in view of the fascinating historical timeline and early discovery of mechanisms intriguing enigmatic behaviours leading to the present day understanding of inertial mass motion; it describes, in eye opening detail, how science has evolved from geometric analysis into the successful complex impulse/acceleration/energy analytical relation techniques used today by the worldwide highest sales volume, best liked Engineering Formula book published by McGraw-Hill, authored by the Kurt Gieck brothers. This study lays an undisputable logic foundation with 8 known mechanisms, with known derivations; this is correlated toward the fulfillment path of inertial propulsion s full potential, the analysis concludes with a rigorous mathematical and physical proof positive derivation leaning on Newton s own math derivation method of the pendulum, his own vector...
