

Advanced Econometrics. Structural Equation Models

By Cesar Perez

Createspace, United States, 2015. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****.Data analysis has evolved and today not work already only observable variables, but also latent variables or factorials. In this case, the underlying data structures are rather less apparent and new specialized software can detect them through the analysis of an array of data, correlations or covariances. Design and modelling has changed a lot in the last two decades. The researcher used to work exclusively with observable variables when all the underlying structures were clear and obvious, but the need for the measure in the social sciences by unobservable variables drove the evolution of modelling in this sense in all the sciences. In this way appear causal models, structural equation or covariance structures developed by Joreskog (1973), Keesing (1972) and Wiley (1973) and expanded in LISREL (Linear Structural Relationship) model and other models that proposed the analysis of covariance structures different representations. The book essentially develop the following topics: MODELS IN STRUCTURAL EQUATIONS MODELLING USING STRUCTURAL EQUATIONS LISREL AND THE STRUCTURAL EQUATION MODEL SAS AND THE STRUCTURAL EQUATIONS MODEL. PROC CALIS LINEAR REGRESSION MODELS AS STRUCTURAL EQUATION MODELS...
