Inorganic and Analytical Chemistry Experiment (21st century higher education model applied experimental materials)

By LI YAN HUI

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 234 Publisher: Nanjing University Pub. Date :2006-09-01 version 1 2006-09-01 1st printing. by introduction of this material . reagents. instruments and basic operation. the experimental data processing. basic experiments. elements of experimental chemistry. design. applied experimental. research. experimental development of classification. to avoid unnecessary duplication. easy to difficult. step by step. adding contents of some new experiments. especially with our teachers to increase their research and related research. development experiments. And stressed the importance not only basic operations. basic skills and methods of training. but also focus on scientific research ability. Develop scientific thinking and ability. Students to master a more comprehensive chemical knowledge and experimental ability to work independently. follow-up courses for learning and future small scale in chemical products such as work to lay a foundation. This book is based on the characteristics of basic training. taking into account the advanced equipment and methods. highlighting the application. design. close to reality. research and development. expanding nature; train students to master the solid foundation of knowledge. standardized experimental operation. a comprehensive analysis of problems. solutions

Reviews

Very beneficial for all type of folks. It can be rally intriguing throgh studying time. You will like how the writer publish this ebook.

-- **Nathan Cruickshank**

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
